

Water Pollution Control Facilities

Scott Potter

WPCF Superintendent

413-477-6959 [Email](#)

The Hardwick WPCF department is responsible for the operations and maintenance of the Gilbertville Wastewater Treatment Plant, the Wheelwright Wastewater Treatment plant, and all associated Pumping Stations.

When a sewage discharge or overflow occurs within the Town of Hardwick, the Hardwick WPCF and/or Sewer Department sends out a public advisory notification. This website will be updated within 2 hours of the notification.

You can see a State-wide list of discharge and overflow events on the [MassDEP website](#). This list is updated within 24 hours of when a public advisory notification is sent.

The fastest way to get information is to sign up to receive public advisory text notifications at the following email address: HardwickWPCF [at] townofhardwick.com. Leave your full name and cell number with a request to receive these text messages.

After-hours emergencies: (774) 757-7150
